DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group IA/IB, claims 1-14, drawn to process of producing an absorber coating.

IA. Embodiment wherein the coating layer is a high neutron capture cross-section and an electrolytically precipitable metallic element.

IB. Embodiment wherein the coating layer is a high neutron capture cross-section and an autocatalytically precipitable metallic element.

Group IIA/IIB, claim 15, drawn to a product (i.e., absorber).

IIA. Embodiment wherein the coating layer is a high neutron capture cross-section and an electrolytically precipitable metallic element.

IIB. Embodiment wherein the coating layer is a high neutron capture cross-section and an autocatalytically precipitable metallic element.

2. The inventions listed as Groups IA/IB and IIA/IIB do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or

Art Unit: 3641

corresponding special technical features for the following reasons: In the present case, there is no common “special technical feature” because the general inventive concept as set forth in the claims does not define over the prior art (See EP 0 055 679 A2).

3. Upon election of IA or IB, the applicant is further required to elect one of the following disclosed species. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

IC. The embodiment wherein the relative movement is generated by a blowing gas only.

ID. The embodiment wherein the relative movement is generated by a ultrasound waves only.

IE. The embodiment wherein the relative movement is generated by both blowing gas and ultrasound waves.

4. Upon election of Group IC, ID or IE - the applicant is further required to elect a single ultimate species for each of the following structures (This additional requirement is to facilitate examination due to the broad range of materials or combination of materials that can be included in applicant's process:

IF. Elect the high neutron capture cross-section material (see claim 2).

IG. Elect the metallic element (see claim 3).

Art Unit: 3641

5. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

6. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The reasons are the same as those set forth in section 2 above.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 3641

amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
